## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-5 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited. In claim 1, on line 2, the period after "strap " should be changed to -- , -- . Further, on line 3 of claim 1, the limitation "material" lacks insufficient antecedent basis. Correction is required.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Reiber (US 6,081,925). Reiber discloses a method for hold sleeves with a configured, elongated adjustable strap (10) made of textile fabric and at least one layer, col. 3, lines 35-42 and as shown in figure 1. Further, the strap has upper and lower sides that are relatively smooth with uninterrupted surfaces and has a label (28) attached to the upper side as shown in figure 5. The strap is adjustably worn around the sleeves with fastening mechanism of hook and loop material (22A, 22B) that does not transverse the entire length thereof as show in figures 2A and 2B. Furthermore, the strap worn about the sleeves is substantially perpendicular the waist of the user when the device is fastened as shown in figure 2B.

5. Claim 5 is rejected under 35 U.S.C. 102(b) as being anticipated by Smart (US 4,825,475). Smart discloses loose clothing defined as a pair of pant sleeves (12) being held together by an article (16) that is not attached to the clothing, col. 2, lines 4-32.
